PREFACE

The Life Orientation Intermediate Phase project was initiated by the National Language Service (NLS) during the 2006/07 financial year. The terms were excerpted from a combination of Life Orientation Learner's Books, Teacher's Guides & Manuals, etc. The list currently comprises about 1079 terms.

The NLS believes that this multilingual terminology list will be an invaluable source in the teaching and learning of Life Orientation. This source of reference will also assist teachers and learners to enhance their understanding and use of core Life Orientation concepts. The compilers of the corpus hope that the project will also help Life Orientation practitioners and the general public to understand these concepts better as they are presented in all the 11 official languages of the Republic of South Africa.

The terminology list will also be published electronically and in the Department of Arts and Culture website.

ACKNOWLEDGEMENTS

This list of acknowledgements is a culmination of the process of consultation and collaboration with different stakeholders and collaborators.

Many stakeholders and collaborators contributed towards this project therefore NLS does not intend to omit any collaborator who gave input in this project.

The NLS would like to express its gratitude to the collaborators who diligently prepared for and actively participated in the terminology meetings. Their commitment and willingness is highly appreciated.

The NLS would like to thank everyone who had the slightest part in the implementation of this project.

EXPLANATORY NOTES

BACKGROUND

The main purpose of this terminology list is to promote better communication between learners and teachers and to educate the general public.

The following terminological units form part of the terminological data corpus of the Life Orientation terms:

Main entry

The main entry contains all the information concerning the concept, including the synonyms, proper names, loanwords, abbreviations, definition, note, equivalents, etc. and has the preferred term as headword.

CBD → central business district

STANDARDISATION

The Terminology Coordination Section of the NLS prepared the source text in English with definitions. After the completion of the source text it was sent to domain/subject field specialist(s) for verification.

Terminologists completed provisional equivalents in their target languages in consultation with subject field experts, as well as using other available sources of information. Terms were discussed, standardised and finalised by collaborators. There were various linguists and individual members of National Language Bodies (NLBs) who worked through the list to verify the content of the target languages.

TREATMENT OF THE SOURCE LANGUAGE TEXT

Headword: The list consists of a headword in the source language which is English. When a headword is a homonym, a separate entry should be created, e.g. *chant* as a verb and *chant* as a noun.

All headwords appear in bold and the size of the letters is slightly bigger than that of the equivalents. The following information is provided for headwords:

Part of speech: In cases where the same term is multifunctional in the sense that it could be a noun, an adjective, or a verb, it was indicated as such. The part of speech is indicated by the editorial abbreviations of n. (for noun); v. (for verb) and adj. (for adjective). Not all the headwords in the alphabetical list have an indication of part of speech.
